

# Upgrade Your Home to **Cut Energy Bills** and **Save Money.** There's Help.

Everyone wants to save money on high energy bills, appliances, or home upgrades. There is help. **Energy programs in your area could save you money or provide products and services at no cost to you.** Talk with a Community Energy Navigator to find out what you can receive. Don't make the decision alone.

Protect yourself from scams and get three estimates. Beware of contractors who:

- ★ Ask for a full payment upfront.
- ★ Claim an offer is only good today.
- ★ Promise rebates, tax credits, or larger refunds.

Get help from a Community Energy Navigator to find out what is available, if you qualify, and how to get it.  
**Call 123-456-7890 or go to [anycompany.org](http://anycompany.org).**
